I. INTRODUCTION

This manual serves as an in-depth guide for effectively utilizing the web application developed by **John Christian Fariola**. It provides detailed instructions on navigation, feature comprehension, and optimal use of the tools available within the application to enhance the overall user experience.

The **Madridejos Community College Alumni Affairs Web Application** is designed to be both comprehensive and user-friendly. To ensure users fully leverage its capabilities, this manual encourages a thorough understanding of its functionalities. Our goal is to create an intuitive and accessible digital environment, catering to users across all levels of technical expertise.

II. GETTING STARTED

Open Your Browser

Launch your preferred web browser on your device. Ensure it is updated to the latest version for optimal performance and compatibility.

Access the Application

In the browser's address bar, type the web application's URL: **<http://mccalumnitracker.com>**, and press Enter.

Explore the Homepage

Upon loading the homepage, you will be greeted with a comprehensive overview of the application's functions and features. The homepage is designed to be user-friendly, providing intuitive navigation and immediate access to essential sections.

Key Highlights of the Homepage

- **Welcome Message:** Encourages alumni to reconnect with the institution, rediscover its spirit, and explore future opportunities.
- **Main Features Overview:** Highlights exclusive **events**, **career opportunities**, **alumni news**, and **job listings** tailored to alumni.
- **Navigation Tips:** Easy-to-find links to key areas, such as **job opportunities**, **updates**, **media galleries**, and **mentorship programs**.

Familiarize yourself with the homepage to understand how to navigate the platform effectively and make the most of its features. This will ensure a seamless and productive user experience.

III. Admin Login Page

This guide provides step-by-step instructions for accessing and navigating the admin page of your system.

Open the Admin Login Page:

- Open your preferred web browser.
- Enter the URL for the admin page (<https://mccalumnitracker.com/admin/>)

- Press **Enter** to load the page.

What Happens Next: The browser loads the page and displays the **Login Page**, which contains input fields for your **Username/Email** and **Password**, along with a **Login** button.

Enter Your Credentials:

Click inside the field labeled **Username/Email** and type your assigned username or registered email.

- For example: **admin123** or **admin**.

Click inside the **Password** field and type your password.

- Ensure that your password adheres to the platform's password policy (e.g., including uppercase letters, numbers, and special characters).

Tip: If you're unsure about your password, click the “eye” icon (👁️) beside the password field to temporarily view your input

Submit the Form

After entering your credentials:

- Click the **Login** button using your mouse.
- Or, press the **Enter** key on your keyboard for quicker submission.

What Happens Next

- The page verifies your credentials. If successful, you will be redirected to the Admin Dashboard.
- If there's an error, such as incorrect credentials, the page will automatically refresh.

Visual Presentation if the Credentials are Correct

- After login, the admin dashboard appears, with a **navigation sidebar** and **main content area**.

Two-Factor Authentication via Gmail Account (if enabled)

If the admin account has two-factor authentication (2FA) enabled, an additional field will appear asking for a Gmail username / Code.

- Open your Gmail account associated with the admin details, and look for code.
- Copy the 5-digit code displayed in the Gmail message in the inbox.
- Paste or type the code into the provided field and click the **Submit** button.

What Happens Next (1): The system verifies the code. If valid, you are granted access to the code input field for confirmation.

Visual Presentation

What Happens Next (2):

After the system confirms your code, you'll receive a token URL that grants access to the actual admin login page. Without this token, you'll be redirected back to the lock page and need to

repeat the process. If you enter an invalid code, you'll also need to restart the process. Any attempt to modify or remove characters from the token URL will result in immediate redirection back to the lock page.

Multi-Factor Authentication via Mobile Number (if enabled)

If your admin account has two-factor authentication (2FA) enabled using a mobile number, an additional verification step will be required. Follow these steps:

Triggering the Verification Code

- Click the button for the OTP

What Happens Next: The system detects the number stored in the admin database then it sends a 5-digit verification code to your registered mobile number via SMS

- Copy the 5-digit code sent to your SMS and put it in the provided input field, this will check if the input code matches the code stored in the database.

A field labeled Verification Code will appear on the same page if user put the incorrect code.

If the user enters the correct OTP, a 'Verification Code Success' message will appear on the same page. The admin will then be redirected to the login page with a token URL to access the page (as explained on page 18).

Handling Errors:

If you encounter errors:

- **Invalid Credentials:** Recheck your username/email and password for mistakes (e.g., typos or case sensitivity).
- **Forgotten Password:** Click the **Forgot Password** link and follow the instructions to reset your password

What Happens Next: A password reset email will be sent to your registered email address, allowing you to create a new password.

IV. Guide to Navigating the Admin Dashboard

The admin dashboard is a centralized interface where you can manage alumni-related tasks, monitor statistics, and perform administrative actions. Below is a breakdown of the key components and their functionalities:

Dashboard Overview

- **What Happens Next After Login:** Upon successful login, the system redirects you to the admin dashboard. The dashboard is a centralized interface containing tools and features you need for administrative tasks.

You will see:

1. Header (Top Bar)

- **User Profile and Options (Top Right):**
 - Shows the logged-in user's name (e.g., "Hitsugaya Toshiro") and profile picture.
- **Actions:**
 - Click on the profile to view account options, such as:
 - Update: Update your profile information.
 - Sign Out: Log out from the admin panel safely.
- **Notifications Icon (Bell)**
 - Click to view system notifications, updates, (e.g. , system messages).
- **Gear Icon (Settings):**
 - Opens the Settings Menu to customize the dashboard's layout and appearance.

What Happens Next If You Continue to Sign-out or Update:

- When you sign out, you are redirected to the login page.
- When you click **Update**, the profile editing interface appears or modal, allowing you to make changes.

2. Sidebar Menu (Left Panel)

The sidebar contains a collapsible menu for navigating through different sections of the admin panel.

Dashboard (Default View):

Shows system statistics, graphs, and visual reports of system activity.

Manage Alumni: Alumni Nested Section Level 1

- **Manage Alumni Section**
 - Add, view, edit, or delete alumni details.
 - Add new batch, course, or department
 - Use filters to find specific alumni by criteria like year, or program.

The screenshot shows the 'Alumni List' page with a table of alumni details. Annotations with arrows point to specific features and actions:

- Import new alumni data**: Points to the 'Import' button at the top of the page.
- Add department**: Points to the 'Add Department' link in the left sidebar.
- Add course**: Points to the 'Add Course' link in the left sidebar.
- Add Batch**: Points to the 'Add Batch' link in the left sidebar.
- Filter Alumni**: Points to the 'Filter' button in the top left of the table.
- Add new alumni data**: Points to the 'Add' button at the top of the table.
- Edit Existing Data's**: Points to the 'Edit' button in the 'Tools' column of the table.
- Delete Existing Data's**: Points to the 'Delete' button in the 'Tools' column of the table.
- Display another data**: Points to the 'View' button in the 'Tools' column of the table.

- **Alumni Status Section**

The Alumni Status page is a management system for tracking and monitoring the employment status of Madridejos Community College graduates. This interface allows administrators to view and manage alumni information across different batches and courses.

- **Basic Navigation**

Actions:

- Use left sidebar to select batch year (2019, 2020, etc.)
- Choose specific course (BSBA, BSIT)
- Use top search bar for quick lookups

What happens next:

- Display updates automatically to show only relevant alumni records

- **Filtering Alumni by Status**

Actions:

- Click "Select Status" dropdown in top-right
- Choose category using employment status:
 - Employed
 - Unemployed
- Choose category using job field status
 - Information Technology
 - Healthcare
 - Government
 - Other employment sectors

What happens next:

- Table instantly filters to show only alumni in selected employment category
- Table instantly filters to show only alumni in selected employment category

- **Record Management**

Actions:

- Select number of entries to display (10, 25, 50)
- Use pagination at bottom to move between pages
- Click "VIEW" button for detailed alumni information

What happens next:

- Table adjusts to show selected number of records
- Clicking "VIEW" opens detailed profile of selected alumni

- **Quick Search**

Actions:

- Type in the search bar (top-right)
- Enter any of these:
 - Name
 - Alumni ID
 - Course
 - Batch year

What happens next:

- Results appear automatically as you type
- Matching records are highlighted
- Non-matching records are

filtered out.

- **Job Category Section**

This system allows administrators to manage job categories for alumni at Madridegos Community College. The interface provides tools to view, add, edit, and delete job categories that alumni can use to classify their employment.

- **Adding New Categories**

- Click the blue "Add New Category" button at the top left
 - Enter the new category name in the provided form
 - Submit the form to add the category to the list

- **Managing Existing Categories**

Each category has two action buttons:

- EDIT (green): Modify the category name
 - DELETE (red): Remove the category from the system

- **Search Functionality**

- Use the search bar in the top right to find specific categories
 - Type keywords and press enter or click the search icon

What Happens Next: Expected Processes and Outputs

When Adding a New Category:

1. After clicking "Add New Category":

- A form modal will appear
- You'll need to enter the category name
- The system will validate the entry to avoid duplicates

2. Upon successful submission:

- The new category appears in the list

- The total entry count increases
- The page refreshes automatically

When Editing a Category:

1. Clicking the EDIT button:

- Opens an edit form with the current category name
- Allows you to modify the text

2. After saving:

- The list updates with the new name
- The change is immediately visible
- The system maintains alphabetical ordering if applicable

When Deleting a Category:

1. Clicking the DELETE button:

- Triggers a confirmation prompt
- Asks you to verify the deletion

2. After confirming:

- The category is removed from the list
- The total entry count decreases
- The page refreshes automatically
- Pagination adjusts if necessary

When Searching:

1. As you type in the search box:

- The list filters in real-time
- Only matching categories are displayed

2. When no matches are found:

- A "No results found" message appears
- The list remains empty until the search is cleared

Visual Presentation Sample

Content Nested Section Level 1

Manage website or platform content, such as news, event, or job offer, gallery, and survey.

- **News**

This system manages news content for Madridegos Community College's website. It provides a comprehensive interface for viewing, adding, editing, and managing news articles with features like thumbnails, author attribution, and publication dates.

1. Overview of the Interface

Table Overview:

The table organizes news articles with the following columns:

1. **Thumbnails:** A preview image associated with each news post.
2. **Title:** The title of the news article.

3. **Author:** The name of the person or department who posted the article.
4. **Description:** A short description summarizing the content of the article.
5. **Date Posted:** The date and time when the article was published.
6. **Tools:** Action buttons labeled "Edit" (green) and "Delete" (red) to manage each post.

2. Detailed Step-by-Step Instructions

A. Adding a New News Post

1. Click "New"

- At the top of the page, press the blue "New" button.

2. Fill Out the Form

- Add the required details:

- **Thumbnail:** Upload an image related to the news.
- **Title:** Provide a concise, clear headline.
- **Author:** Input the name or department responsible.
- **Description:** Write a brief summary of the content.

3. Submit the Entry:

- Press the Submit or Save button

B. Editing an Existing News Post

1. Find the Entry:

- Locate the article you want to edit in the table

2. Click "Edit":

- Press the green "Edit" button in the "Tools" column.

3. Modify Details:

- Update the relevant fields such as title, description, or thumbnail.
- Save the changes to apply the edit.

C. Deleting a News Post

1. Find the Entry:

- Locate the news post you wish to delete.

2. Click "Delete":

- Press the red "Delete" button in the "Tools" column.

3. Confirm Deletion:

Confirm the action in the popup prompt (if any)

The screenshot shows the 'Content > News' interface for Madroque Community College. It features a table with columns: Thumbnails, Title, Author, Description, Date Posted, and Tools. The table lists several news items. Annotations with arrows point to specific UI elements:

- Add new news data on the list:** Points to the '+ New' button in the top left.
- Search and filter data:** Points to the search bar in the top right.
- Edit new news data on the list:** Points to the 'Edit' button in the 'Tools' column of the first row.
- Delete News Data on the list:** Points to the 'Delete' button in the 'Tools' column of the first row.
- Select new display of the data:** Points to the dropdown menu at the bottom right of the table.

The **Event**, **Gallery**, **Survey**, and **Job** modules share similar CRUD (Create, Read, Update, Delete) functionalities while serving different content purposes.

Common Functionality Across All “Content” Modules

All modules share these core features:

- "New" button for creating entries
- Search functionality in the top right
- Show entries dropdown (10, 25, 50, etc.)
- Edit and Delete actions for each entry
- Pagination system
- Sorting capabilities
- Thumbnail support where applicable

Report Nested Section Level 1

- Survey Report Section
- Alumni Report Section
- Event Report Section

Survey Report Section

The Survey Report section allows administrators to view and manage various types of feedback surveys across different aspects of the college experience. This interface provides access to multiple survey categories through a grid-based dashboard.

Accessing Survey Reports

1. Navigate to Report > Survey from the left sidebar menu
2. The main interface displays a grid of survey report cards, each representing a different survey category

View Detailed Report for Survey

Navigate to Survey Report Page Using Drop Down

Using Survey Report Cards

Each survey card contains:

- View Report" button for accessing detailed results

Key Features

1. Search Functionality

- Use the search bar in the top-right corner to filter survey reports
- Search by survey name

2. Report Actions

- Click "View Report" to see detailed survey results

Detailed Report Page After Clicking “View Report”

Alumni Report Section

The Alumni Report section allows administrators to track and manage alumni information, including their employment status, course details, and response data. This interface provides a structured view of alumni records organized by batch year.

Accessing the Alumni Report

1. Click on "Report" in the left sidebar menu
2. Select "Alumni Report" from the dropdown options
3. The main interface will display the alumni data table and folder structure

Top Bar

- **Print Button:** Located at the top-left for printing reports
- **Search Bar:** Located at the top-right for finding specific alumni records

Folders Panel (Left Side)

1. All Respondents

- Shows total number of respondents in a red circle
- Displays all alumni responses regardless of batch

2. Batch Organization

- Organized by graduation year (e.g., BATCH 2019, BATCH 2020)
- Sub-folders for specific courses:
 - BSBA (Bachelor of Science in Business Administration)
 - BSIT (Bachelor of Science in Information Technology)

Common Tasks

Viewing Alumni Detail

1. Locate the desired alumni record
2. Click the "VIEW" button in the Tools column
3. Review detailed information in the popup window

Filtering Records

1. By Batch:
 - Click on specific batch folder in the left panel

- Select specific course sub-folder if needed

2. By Search:

- Use the search bar at the top-right
- Enter any relevant information (name, course, batch, etc.)

Printing Reports

1. Filter/select desired records
2. Click the "Print" button at the top
3. Configure print settings in the browser dialog
4. Confirm to print

Event Report Section

The Event Responses Report section enables administrators to track and monitor student participation in various college events. This interface provides organized access to event participation data, sorted by event type and academic batch.

Accessing the Event Report

1. Navigate to "Report" in the left sidebar menu
2. Select "Event Report" from the submenu options
3. The interface will display the event responses data table and folder structure

Print Option

Interface Components

Top Bar Navigation

- Print Button: Blue button in the top-left for generating printed reports
- Search Bar: Located in the top-right corner for finding specific records

Common Tasks

Viewing Event Participation

1. Select event category from left panel
2. Filter by specific batch/course if needed
3. View participation details in the main table

Filtering Records

1. By Event:

- Click specific event folder in left panel
- Select course/batch sub-folder if needed

2. By Search:

- Use search bar at top-right
- Enter name, course, batch, or event name

Generating Reports

- Select desired event category/filters
- Click "Print" button
- Review and confirm print settings
- Generate report

Print Data

Name	Course	Batch	Status	Date Responded	Event Participated
Joann Rebamonte	BSIT	2020	PARTICIPATED	November 2, 2024	Intramurals

Logs Section

The Account Activity section provides administrators with detailed logs of system access attempts, security events, and user activities. This interface helps monitor and track user behavior and potential security incidents.

Accessing Account Activity Logs

- Click on "Logs" in the left sidebar menu
- The interface displays a chronological timeline of all system activities

Common Tasks

Filtering Log Data

1. Set desired date range:
 - Enter Start Date
 - Enter End Date
 - Click "Filter" button

Investigating Security Events

1. Review red warning indicators for suspicious activities
2. Check login attempt patterns
3. Verify geographical locations
4. Monitor device and browser information

Tracing Locations

1. Locate event of interest
2. Click "Trace Location" button
3. View geographical data on map

Apk Version Section

The App Versions section allows administrators to manage mobile application versions, including uploading new APK files, editing version information, and maintaining version history.

Accessing App Versions Section

1. Click on "Apk Version" in the left sidebar menu
2. The interface displays a list of all application versions

Common Tasks

Adding a New Version

7. Adding a New Version
8. Click "Add New Version" button
9. Enter version number
10. Upload APK file using Browse button
11. Click Save to confirm

Editing an Existing Version

1. Click "EDIT" button (green) for the desired version

In the popup window:

- Modify version number if needed
- Current APK file path is displayed
- Options to:
 - Download existing APK
 - Browse to upload new APK

2. Click Save to confirm changes

- Or Close to cancel

Deleting a Version

1. Click "DELETE" button (red) for the desired version
2. Confirm deletion when prompted

V. Complete Guide: Importing JSON to Firebase Realtime Database

Initial Setup Steps

1. Gmail Login

1. Go to www.google.com
2. Click "Sign In" in the top right corner
3. Enter your Gmail address and password

What happens next: You'll be redirected to Google's main page with your account logged in.

2. Accessing Firebase Console

1. Go to console.firebase.google.com
2. If prompted, select the same Google account you just logged into
3. Wait for the Firebase Console to load

What happens next: You'll see the Firebase Console dashboard with all your projects (if any exist).

3. Project Selection/Creation

1. If you have an existing project:
 - Click on your project name from the list

2. If you need to create a new project:
 - Click "Create Project"

- Enter your project name
- Accept the Firebase terms
- Click "Continue" through the setup steps
- Wait for project creation to complete

What happens next: You'll be taken to your project's dashboard showing various Firebase services.

4. Setting Up Realtime Database

1. In the left sidebar, click "Build"
2. Find and click "Realtime Database"
3. Click "Create Database" (if it's your first time)
4. Choose your database location (pick the closest to your users)
5. Select "Start in test mode" for development
6. Click "Enable"

What happens next: Your Realtime Database will be created and you'll see the database dashboard with an empty data tree.

5. Importing JSON Data

1. In the Realtime Database dashboard, click the : (three dots) menu
2. Select "Import JSON"
3. Click "Browse" to select your JSON file
4. Locate and select your JSON file
5. Click "Import"

What happens next: Your JSON data will be uploaded and you'll see it appear in the database tree structure.

6. Setting Up Database Rules

1. Click on the "Rules" tab at the top of the database panel

2. Replace the existing rules save in the database folder, copy all rules (Ctrl + A) and paste it inside the rule page.

3. After locating the file, try to open it using Notepad or any editor text

4. If the file already open, copy all the text, for smooth process, try to Ctrl + A the entire text

5. After the text being copy, paste it in the rules and click “Publish”

If JSON Import Fails:

1. Verify your JSON format using a JSON validator
2. Ensure file size is under 256MB
3. Check if all special characters are properly escaped
4. Try importing smaller portions of data if dealing with large files

Creating/Adding Apps in Firebase

Adding a New App

Method 1: From Project Overview

1. Click on the Project Overview in the left sidebar

2. In the right side of the page, locate "Add App"

3. Choose your platform icon:

What happens next: Platform-specific registration flow will begin.

VI. Setting Up Firebase Database URL in PHP Configuration

Step 1: Opening Visual Studio Code

1. Double click on Visual Studio Code icon on your desktop
2. Click on "File" → "Open Folder" (or press Ctrl+K Ctrl+O)
3. Navigate to your project folder
4. Click "Select Folder" (e.g maccalumni)

What happens next: Your project folder will open in VS Code's explorer panel

Step 2: Open Configuration File

1. In VS Code's explorer panel, click "admin" folder and "includes" folder
2. Select "includes" folder
3. Open the "config.php"
4. Search for databaseURL and replace the value (e.g <https://mccnians-bc4f4-default-rtdb.firebaseio.com/>) and saved the file
5. You can get the API just by copy it into your realtime database console

What happens next: Now your website is connected into firebase, just double check the API from your realtime database if it is correct or no mismatch occurred during pasting.

VII. SETTING UP FIREBASE DATABASE URL IN JAVA CONFIGURATION

A. Prerequisites Setup

1. Android Studio Installation

- Download Android Studio from official website
- Install Android Studio
- Launch Android Studio

2. Firebase Project Setup

- Visit Firebase Console (console.firebase.google.com)
- Create new project or select existing project
- Add Android app to Firebase project

B. Download and Configure google-services.json

1. Download Configuration File

- In Firebase Console, go to Project Settings

- Under "Your apps", select your Android app
- Click "Download google-services.json"

2. Place Configuration File

- Open your Android project in Android Studio
- Navigate to Project view (Alt+1)
- Locate the 'app' folder
- Place google-services.json directly inside the 'app' folder

What happens next: Android Studio will recognize the Firebase configuration file

C. Database URL Configuration

1. Search all the firebase API just by pressing Ctrl + SHIFT + F
2. Copy the old API (e.g, <https://mccnians-bc4f4-default-rtdb.firebaseio.com/>) and paste it in the search bar, this will display all the file that uses same API you pasted in the search feature.

If you ever want to replace the API, simply press Ctrl + Shift + R to reveal the replace bar. Paste the new API from Firebase and select “Replace All.” This will replace the existing API with the new one. Be cautious when making these changes, as an incorrect API may disconnect the application from the database.
